

A commitment to training is an investment that really pays off. Our certified trainers deliver structured training that gives your staff the knowledge and experience that are critical to success. Graduates gain the skills needed to ensure effective product use, enable successful deployment, and avoid potential risks as your reporting solution needs grow.

## Classroom Training

Certified instructors cover three days of structured task-based training, including hands-on exercises where students develop and publish reports that they create during the training sessions. Students are expected to have a basic working knowledge of relational databases, SQL, Java, and JSP's.

**Our next public training session at Jinfonet is scheduled for: *November 14 - 16, 2006.***

**To sign up, call (240) 477-1000 and ask for Sales or email [sales@jinfonet.com](mailto:sales@jinfonet.com).**
